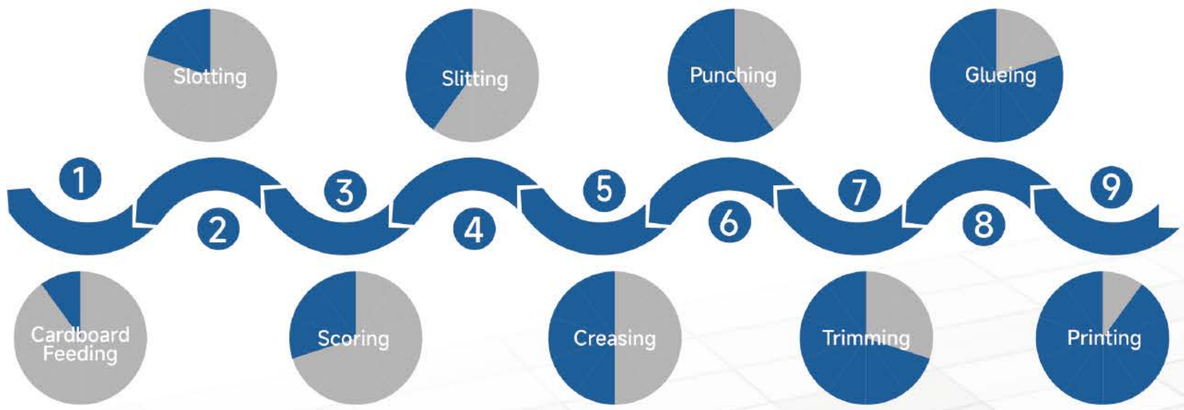
LQ-MD 2500 Series Corrugated Box Making Machine

Introduction

This equipment integrates paper splitting, slotting, wire pressing, punching, and adhesive dripping (optional). The mechanical structure of a single blade and single servo reduces the order changing time to about 3 seconds and greatly reduces the limitations of the equipment. It can complete the special box type of high and low pressure lines. Currently, more than 120 different box types can be produced.

One Stop Operation



Overview

- Cardboard feeding, slotting, scoring, slitting, creasing, punching, trimming, gluing, and printing all completed in one operation. Time-saving and effortless.
- Switchover time about 3 seconds.
- 100+ box types available to meet your customized box requirements.
